

Historical Ecology for the Future

International conference

Metz, France, 25th to 29th May 2020

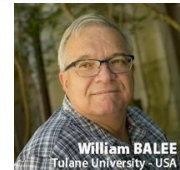

Historical Ecology for the Future aims at promoting historical ecology and highlighting its recent advances and key results. Geographers, biologists, historians, social scientists, economists, archaeologists, ecologists, paleoecologists, managers, and soil scientists, among others dealing with historical ecology issues, are welcome to join the conference to share and discuss their questions, data, and results.

Keynotes speakers symposium.inra.fr/hef2020/Program

Introduction keynote

William BALEE (Tulane University – USA)

Session 1: Historical heritage and conservation management

Thierry DUTOIT (IMBE – CNRS – Avignon University – France)

Session 2: Environmental resource exploitation

Nicki WHITEHOUSE (University of Plymouth – UK)

Session 3: Ecological dynamics

Kris VERHEYEN (ForNaLab – Belgium)

Session 4: Methods and tools in historical ecology

Jérôme POULENARD (EDYTEM laboratory – France)

Key dates

Call for abstract: **September-December 2019**

Registration open: **September 2019- February 2020**

Program announcement: **February 2020**
